FINN

Software Engineering Intern - Backend (m/f/x)

Munich or Remote

FINN makes mobility fun and sustainable. With a flexible car subscription, we bring a true e-commerce experience to car ownership and offset all CO2 emissions along the way. Join our fast-growing startup to build the most popular auto e-commerce platform. We work with the best car brands in the world and are backed by leading global investors.

Your Role

As a Software Engineering Intern - Backend, you are working hand in hand with our teams and automate every single aspect of their work. Your main area of responsibility will be to identify, build and maintain automations with a no-code platform.

Your Benefits

- You have the flexibility to work either in our Munich office or remotely anywhere in Germany.

- With massive growth potential, FINN allows you to quickly develop and succeed in a highly motivating startup environment with ambitious challenges in cross-functional teams.

- Excellent monthly salary of 2,800€.

- Discounted qualitrain membership enabling you to be active in various gyms within Germany.

- Our open, modern office in the middle of Munich is known for loads of fun with amazing colleagues and frequent team events.

- You want to drive your own car with FINN? – Get one with our employee discount program.

Your Responsibilities

- Manage and drive your own projects: All of your projects will have a critical impact on our company.

- Improve day-to-day processes: Work on the developer portal as a single source of truth for our developers.

- Identify, build and maintain automation: Work on existing and new automations with the no-code platform Integromat. Learn how to build simple and robust automations to boost every aspect of our product.

Your Profile

- Enrolled in a German university (remote work is possible from Germany).

- Available for at least 6 months to work full-time (40 hours/week).

- Previous experience in a high growth startup or another high-performance environment is a plus.

- Understanding of web protocols like HTTP. Previous experience in automation (IFTT, Zapier, Integromat) is a plus.

- Comfortable understanding code in one or more programming languages, such as NodeJS,Python or Java.

- Highly analytical and comfortable with numbers.

- Strong growth mindset and the motivation to continuously improve self and team performance.

- Fluency in English.

Interested in Joining Our Fast-Growing Startup?

Please upload your CV and transcripts online. Andreas Wixler and Henriette Brune are looking forward to your application!

Equal Opportunities for Everyone

FINN is an equal opportunity employer. We embrace and celebrate diversity and are committed to creating an inclusive and safe environment for all employees. Experience comes in many forms and we're dedicated to adding new perspectives to the team. We encourage you to apply even if your experience doesn't perfectly align with what we have listed. We'd love to hear from you!
